BEYOND EXPECTATION

PELLET | ELECTRIC | WOOD | BIO ETHANOL

The warmest of welcomes

Welcome the
warmth of Elcofire
into your home with
fires and stoves that
embody elegance
and epitomise
efficiency.

Born out of our passion for precision engineering, our expert team has combined their collective industry knowledge, technical expertise, and customer experience to deliver products unparalleled in their design.

Our commitment to quality and sustainability means we use only the best available components and state-of-the art manufacturing techniques to create beautiful products that will last a lifetime and beyond, providing your home with years of comfort and warmth.

BEYOND
EXPECTATION

OUR SERVICE PILLARS

We have three key principles that we stand by in the design and supply of our products and services. These service pillars help us to deliver the quality experience our customers both deserve and have come to expect.

Style

Whether a cabin or a cottage, a house or a high-rise apartment, we believe each of our products should fit effortlessly into our modern ways of living, offering a contemporary elegance and stylish aesthetic that brings a unique warmth to every home.

Sustainability

Creating the best fires for our customers also means designing the best products for the world we live in. That means pushing the boundaries not only of energy efficiency, but of longevity, sourcing components and using modern manufacturing techniques to come up with products that will last lifetimes.

Service

Warmth is not simply what our products deliver. It is a key component of the service we provide to our customers, with installation guides, service aftercare, and warranties that enable our team to provide the highest, most human level of care.

OUR SUSTAINABILITY COMMITMENT

The EU Ecodesign Directive obliges manufacturers to design energy-using products that consume less energy and improve air quality throughout their life cycle. All Elcofire fires and stoves conform to this legislation and carry Ecodesign Directive energy labelling.

High Efficiency

All Elcofire products have been designed to operate with high thermal efficiency, minimising the loss of heat energy during use. Every model in this brochure is subject to EU energy labelling standards and almost all are rated as either A or A+ energy class appliances.

Defra Exempt

Most town and city homes are located in Smoke Control Areas. To burn logs in these locations, the stove installed must be granted exemption from these restrictions by the government through DEFRA (Department for Environment Food and Rural Affairs in the UK). Independently tested to demonstrate particularly clean burning combustion, Elcofire stoves have DEFRA exemption.

Eco Design

All Elcofire stoves meet the stringent air quality standards of Ecodesign, featuring Cleanburn technology for high-efficiency heating in Smoke Control Areas. They also meet, and in many cases exceed, Ecodesign emission and efficiency standards. Our low-emission stoves reduce particulates by up to 84% compared with old appliances.

OUR PROMISE

SOLID FUEL WARRANTY

Elcofire Stoves are a quality product with a 5-year warranty for your peace of mind, which covers all stove body castings. This does not include consumable items as such as glass, door seals, grates, firebricks, vermiculite panels, baffles and log guards.

PELLET FIRE WARRANTY

Elcofire Pellet Stoves are a quality product with a 2-year warranty for your peace of mind, which covers all stove body castings. This does not include consumable items as such as glass, door seals, grates, firebricks, vermiculite panels, baffles and log guards, electrical components, all electrical components are guaranteed for 1 year.

ELECTRIC FIRE WARRANTY

Elcofire Electric Fire are a quality product with a 2-year warranty for your peace of mind, which covers all components excluding the Glass.

BIO ETHANOL WARRANTY

Elcofire Bio Ethanol Fire are a quality product with a 1-year warranty for your peace of mind, which covers all components excluding the Glass.

PRODUCT SPECIFICATIONS

Elcofire products represent the cutting edge in low-emission stoves, with an assortment of features across our range that deliver comfort in the home and environmental sustainability to the world.
